

REACH REGISTRATION

Registration Evaluation and Authorization of Substances in the EU on the safe side with DEKRA.

The EU Regulation No. 1907/2006 ("REACH") requires the Registration, Evaluation and Authorization of all hazardous chemical substances. This applies to substances that are produced within the EU or imported into the EU in volumes above 1 tonne per year. The registrant has to prepare a registration dossier and submit this dossier to the European Chemical Agency, ECHA. For this highly complex process, DEKRA can be your guide and help you to achieve compliance efficiently and effectively.

Industrial services

Three steps to registration:

1. **Analysis:** Define which substances will have to be registered under REACH. Optimization of the portfolio, define the timeframe.

2. **Data gathering:** Define the data that will have to be provided in the dossier. This is dependent upon the volume of substance that is manufactured and the level of hazard. Gather data via lab testing and/or from literature via data searches or join a consortium if possible.

3. **Dossier preparation:** Enter company and substance specific data using the ECHA approved IUCLID5 system. Then submit the dossier via the REACH-IT system to ECHA.

Your advantages:

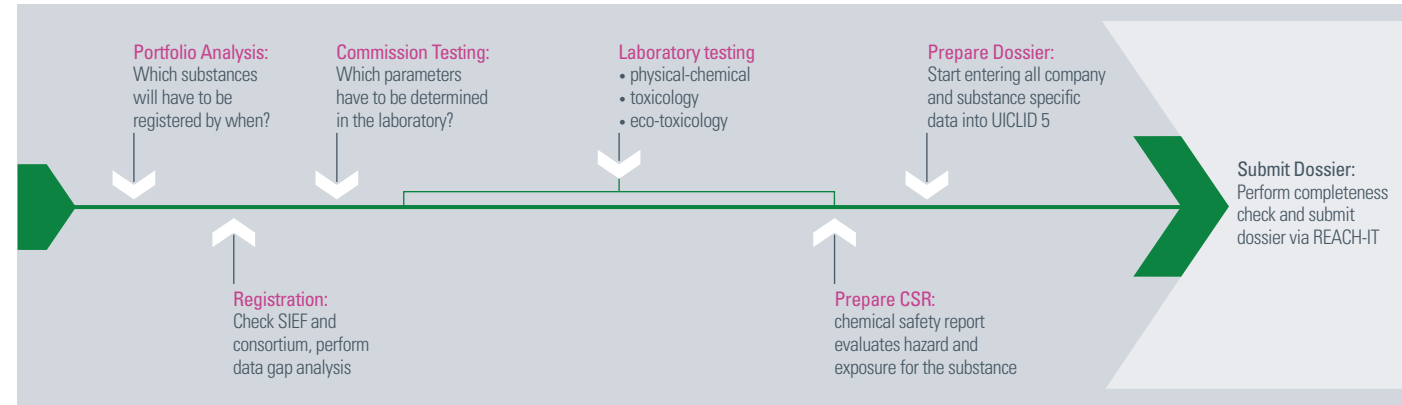

- Experienced experts – DEKRA is REACH Only Representative (OR) for non-EU manufacturers and assures their market access.
- Consulting and lab analysis in a one-stop shop – the best way to your substance data.
- GLP and ISO 17025 laboratory accreditation – ensures that test data is dependable and acceptable to ECHA.
- Tailor-made instead of one size fits all we care for your individual needs.
- DEKRA – your global partner for registration of chemicals.

Industrial services

Your route to REACH compliance

DEKRA will assist you on your journey to achieve REACH compliance using a one-stop shop approach. We offer a complete service or any individual part that you may require.

About Us

We are consultants and business partners to many of the world's largest chemical, oil and gas, transportation, utility, pharmaceutical, and agriculture companies. Through a transformational approach, we guide clients in evolving both their organizational culture and their operational environment, enabling them to reduce exposures and injuries, save lives, protect assets—and in the process, achieve higher performance. DEKRA Insight represents the collective expertise of our legacy businesses, each an institution in safety.

DEKRA Industrial

Wherever you are, we are close at hand. Throughout Europe and around the world, the closely meshed DEKRA network provides you with the solution for all areas of your company you needs.

Whether information or advice, measurement, testing, or certification, we offer a comprehensive range of consistently high quality services.

We will be delighted to discuss your thoughts and requirements.

Our Experience

DEKRA has fulfilled the Only Representative position for several companies based outside the EU. We have assisted in optimizing substance portfolios, represented the company in consortia, carried out additional testing and prepared the registration dossier for manufacturers.

Create confidence with your customers and be on the safe side with DEKRA.
